Sun Safety Policy

At Fun Foundations Day Nursery we are committed to ensuring that all children are fully protected from the dangers of too much sun/UV rays. Severe sunburn in childhood can lead to the development of malignant melanoma (the most dangerous type of skin cancer) in later life.

We follow guidance from the weather and UV level reports and use the following procedures to keep children safe and healthy in the sun:

- Key workers will work with the parents of their key children to decide and agree on suitable precautions to protect children from burning, including more sensitive skins types and those that may be more tolerant to the sunshine, e.g. black and/or Asian colouring
- Children must have a clearly labelled sun hat which will be worn at all times whilst outside in sunny weather. This hat will preferably be of legionnaires design (i.e. with an extended back and side to shield children's neck and ears from the sun) to provide additional protection. Nursery can supply these for a fee of £5.00
- Sun cream containing nut-based ingredients will not be allowed in the setting
- Children must have their own labelled high factor sun cream with prior written consent for staff to apply. This enables children to have sun cream suitable for their own individual needs. Staff must be aware of the expiry date and discard sunscreen after this date
- Parents are requested to supply light-weight cotton clothing for their children suitable for the sun, with long sleeves and long legs
- Children's safety and welfare in hot weather is the nursery's prime objective so staff will work closely with parents to ensure all appropriate cream and clothing is provided
- Staff will make day-to-day decisions about the length of time spent outside depending on the strength of the sun (UV levels). Children will not be allowed in the direct sunlight for long periods of time between 11.00am – 3.00pm on hot days from March to October, following NHS sun safety advice. Shaded areas are provided to ensure children are able to still go out in hot weather, cool down or escape the sun should they wish or need to
- Children will always have sun cream applied before going outside in the hot weather and at frequent intervals during the day
- Children are encouraged to drink cooled water more frequently throughout sunny or warm days and this will be accessible both indoors and out
- Children are made aware of the need for sun hats, sun cream and the need to drink more fluids during their time in the sun
- Shade is provided in the form of undercover shelters and an additional gazebo to ensure children are still able go out in hot weather, cool down or escape the sun should they wish or need to.
- Key workers will also work with the parents of their key children to decide and agree on suitable precautions to protect children from burning.

Vitamin D

Sunlight is important for the body to receive vitamin D. We need vitamin D to help the body absorb calcium and phosphate from our diet. These minerals are important for healthy bones, teeth and muscles.

Our body creates vitamin D from direct sunlight on our skin when we are outdoors. Most people can make enough vitamin D from being out in the sun daily for short periods with their hands or other body parts uncovered. At nursery, we find the right balance to protecting children from sunburn by following NHS guidance. The benefits are discussed with parents and their wishes followed with regard to the amount of sun cream applied.

We also promote the NHS recommendation to parents that all children aged under 5 years should be given vitamin D supplements even if they do get out in the sun.
